duration: the entire exhibition timeframe

what are you doing?  
 why?  
 what are you exploring?  
 is anything you're thinking about  
 compelling from anything you've  
 explored in the past?

you can't recreate the past i.e.  
 relive it... fleeting moment to  
 moment → exploring the idea  
 of now? "something just like  
 this" "what's next?" what's  
 next? what's next?"

paper chairs  
 too!  
 I still want there to be  
 some element of "object here" / something  
 is "off"

thinking super immersive → a  
 total transformation of the  
 gallery space

the idea of time → nothing can  
 ever be replicated or repeated  
 just the same, yet I'd be  
 repeating

this  
 is "why  
 people  
 should  
 care"  
 of time  
 applies  
 to everyone
